

The In Line Flaring Tool enables the user to flare copper or soft steel tubing in tight spaces with its low-profile design. This patented flaring tool design makes perfect single or double flares easily. The double clamp and hex body keeps tube from slipping, keeps flares centered, and makes the job of flaring easier.

- Flares can be achieved along frame rails or areas in the engine compartment, saving the user time from having to remove components or complete lines to make repairs.
- Can be used with ratchet or wrench
- Superior to bar-type flaring tools

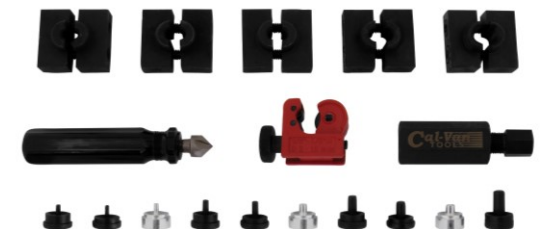

Package Type: Blow Molded Case
