

Noid Light Set

This Noid Light set provides the technician a convenient quick and easy method for detecting if there is an electrical signal at the fuel injector. Performing the test with this tool is easy. Simply plug in the Noid Light and start the engine. If the Noid Light flashes, then this indicates that there is current available to the injector.

- Covers applications for many popular makes, including GM PFI, Bosch PFI, Ford TBI, Geo TBI, GM SCPI, and GM TBI.
- Kit includes a convenient harness extension design for remotely viewing from the driver's seat
