

Tool designed to hold harmonic balancer for removal and installation. The use of this tool eliminates the need to remove the radiator to make space for an impact wrench.

- Time is saved by not having to refill and bleed the air out of the cooling system when changing a timing belt.
- This tool combines the individual tools available into one tool, while also increasing applications.

Package Type: Box with Label

Dimensions: 4.25" x 4.25" x 4.5"
