

Blind Hole Bearing Puller

The blind hold bearing puller is designed for removing bearings from a recessed location, such as a pilot bearing.

- Set includes a chrome-plated 2.5lb T-handle slide hammer and four collets, designed to fit a wide range of applications
- Easy to operate. Choose the appropriate collet by application, insert the collet into the inner portion of the bearing, expand the collet, thread on the slide hammer to attach, and remove the bearing.

Package Type: Blow molded Case
