

This tool provides a helping hand when installing U-joint bearing cups on many automotive applications: cars, trucks, and beyond. The internal magnet of the C-frame holds one bearing cup steadily in place, while allowing you to position the other, and making installation easier.

- Easily installs U-joint bearing cups with the assistance of an internal magnet
- Designed to be used for automotive, light-truck, and medium duty applications.
- Constructed of high-strength materials for the ultimate strength and durability
